

3D Object Retrieval Workshop Series

3D object representations have become an integral part of modern computer graphics applications, such as computer-aided design, game development and film production. At the same time, 3D data have become very common in various domains such as computer vision, computational geometry, molecular biology and medicine.

Indeed, the rapid evolution in graphics hardware and software, in particular the availability of low cost 3D scanners and modeling tools, has greatly facilitated 3D model acquisition, creation, and manipulation, giving the opportunity to a large user community to experience applications using 3D models. As the number of 3D models is growing rapidly, the problem of creating new 3D models has shifted to the problem of searching for existing 3D models. Thereupon, the development of efficient search mechanisms is required for the effective retrieval of 3D objects from large repositories.

The aim of the 3DOR Workshop series is to stimulate researchers from different fields such as Computer Vision, Computer Graphics, Machine Learning and Human-Computer Interaction who work on the common goal of 3D object retrieval, to present state-of-the-art work in the field. This will provide a cross-fertilization ground that will stimulate discussions on the next steps in this important research area. 3DOR 2011 will take place as the fourth workshop in this series on April 10, 2011 in Llandudno (UK), on the day before Eurographics 2011.

Call for Papers, Posters and System Demonstrations

Authors are invited to submit original and unpublished research and practical applications in all areas of 3D Object Retrieval. Submissions are invited in form of full and short papers, as well as poster and system presentations. Suggested topics include, but are not limited to:

- 3D object similarity and matching
- 3D object classification, indexing, and mining
- Similarity of non-rigid shapes
- Feature extraction, decomposition, and segmentation
- Multi-level representations for matching and retrieval
- Partial, part-in-whole, and many-to-many matching
- Matching under uncertainty and noise
- Semantics-driven 3D object retrieval and classification
- Sketch-based retrieval
- Query interfaces and search modalities
- Benchmarking issues
- Relevance feedback methods
- Active learning
- Generative/discriminative approaches in 3D object categorization
- Applications in multimedia, CAD, games, biometrics, e-science, e-learning, medicine, biology, and cultural heritage.

Important dates

January 10, 2010: Submissions due (extended)

February 12, 2011: Notification of acceptance

February 22, 2011: Camera-ready papers

April 10, 2011: Workshop takes place

This year's workshop will also feature the 6th Shape Retrieval Evaluation Contest (SHREC'2011). A separate call for participation will be issued later on.

Extended versions of selected papers from the Workshop will appear, after a further review, in a special issue of The Visual Computer Journal published by Springer.

Chairs

Hamid Laga,
Tokyo Institute of Technology, Japan

Tobias Schreck,
Technische Universitaet Darmstadt, Germany

Programme Chairs

Alfredo Ferreira,
IST/Technical University of Lisbon, Portugal

Afzal Godil,
National Institute of the
Standards and Technology, USA

Ioannis Pratikakis,
Democritus University of Thrace, Greece

Event sponsored by

Program Committee

Ceyhun Burak Akgül
Vistek-ISRA Vision, Turkey

Filipos Azariadis
University of the Aegean, Greece

Benjamin Bustos
University of Chile, Chile

Mohamed Daoudi
TELECOM Lille1/LIFL, France

Dieter W. Fellner
Fraunhofer IGD, Germany

Daniela Giorgi
IMATI-CNR, Italy

Frank Ter Haar
TNO, The Netherlands

Nadia Magnenat-Thalmann
Geneva, Switzerland

Simone Marini
IMATI-CNR, Italy

Ron Kimmel
Technion, Israel

Georgios Papaioannou
AUEB, Greece

Eric Paquet
CNRC, Canada

Karthik Ramani
Purdue University, USA

William Regli
Drexel University, USA

Marcos Rodrigues
Sheffield Hallam University, UK

Raif M. Rustamov
Drew University, USA

Nickolas S. Sapidis
Univ. of Western Macedonia, Greece

Dietmar Saupe
University of Konstanz, Germany

Michela Spagnuolo
IMATI-CNR, Italy

Theoharis Theoharis
University of Athens, Greece

Theodore Trafalis
University of Oklahoma, USA

Jean-Philippe Vandeborre
TELECOM Lille1 / LIFL, France

Remco Veltkamp
Utrecht University, The Netherlands

Anne Verroust Blondet
INRIA, France

Sofiane Yous
Trinity College Dublin, Ireland
